

Michael Wadman

SOLUTIONS ARCHITECT/PRINCIPAL ENGINEER

✉ michael@wadman.co.nz | 🌐 wadman.co.nz | 🐙 mwadman

Summary

- Technical lead with 10+ years of experience building and maintaining reliable and scalable IT infrastructure.
- Proven track record delivering complex IT projects and systems, spanning networking, automation and platforms.
- Passionate about technologies that enable teams to focus on driving innovation rather than manual operations.

Work Experience

New Zealand Government

SOLUTIONS ARCHITECT

Blenheim, New Zealand

January 2023 – Present

- Enterprise technical lead for cloud and compute platforms, developer tooling and automation.
- Responsible for the creation, communication, prioritisation and integration of architecture strategy and roadmaps.
- Designed and implemented highly-available, multi-organisation, on-premises Kubernetes cluster, resulting in reduced platform costs, automated security control implementation, and increased organisational agility.
- Built and onboarded organisation to its' first Azure tenancy, including adoption and migration to M365, Sentinel and Intune.
- Set standards for, and led organisational adoption of, DevOps and GitOps practices for both public cloud and on-premises platforms, systems and applications.
- Represent New Zealand in ongoing international engagements and technical forums, contributing to global standards in a way that forwards NZ values.

SENIOR NETWORK ENGINEER

November 2019 – January 2023

- Technical lead for Azure based multi-organisation private cloud delivery and migration, onboarding multiple organisations and reducing their infrastructure provisioning time from weeks to minutes.
- Provided technical leadership and expertise to large and/or complex projects, including VXLAN/EVPN data center migration and network monitoring, logging and management systems refresh.
- Developed configuration management (infrastructure as code) code and tools, and pioneered adoption throughout the organisation.
- Definition and documentation of architecture and protocol standards.

NETWORK ENGINEER

July 2017 – October 2019

- Responsible for maintenance, monitoring and troubleshooting of all network equipment.
- Wrote and lead internal technical training courses on the topics of networking, automation and Linux.
- Designed, tested and automated data center network integration for OpenStack based private cloud deployment.
- Provided network and systems engineering expertise towards successful delivery of a multi-million dollar all-of-government IT project.

2degrees Enterprise

SENIOR MANAGED SERVICES ENGINEER

Christchurch, New Zealand

October 2016 – June 2017

- Escalation point for difficult technical queries or ongoing issues from other team members.
- Provided design assistance and expertise for other internal teams.
- Technical assessment and delegation of incoming tickets to team members.
- Mentored and wrote technical training for new engineers.

MANAGED SERVICES ENGINEER

March 2014 – September 2016

- Designed, implemented and supported all services; including customised managed LAN, WAN and internet solutions.
- Wrote and maintained technical documentation for both internal and external use.

Snap Internet

SERVICE CENTER TECHNICIAN

Christchurch, New Zealand

April 2013 – February 2014

- Provided technical, provisioning and billing assistance for Snap Internet's residential and small business customer base.
- Trained new technical staff in current and new technologies.

Skills Summary

- Platforms (Kubernetes, OpenShift, Azure, Azure Stack Hub).
- Linux (Debian and Red Hat Enterprise Linux (RHEL)).
- Infrastructure as Code and CI/CD (Git, Python, Bash, Ansible, Terraform, GitOps, ArgoCD).
- Containers (Docker, Podman, Helm).
- Observability (LibreNMS, Fluent, Loki, Prometheus, Thanos, Grafana).
- Multi-vendor, multi-platform networking experience (Juniper, Cisco, Cumulus, Dell, Palo Alto).
- Networking protocols (Routing, Switching, MPLS and VPNs).
